UNIQUE SELLING POINTS (USP)

HIGH CAPACITY LI-PO

The battery inside the V3pro rechargeable is a high capacity low weight Li-Po cell with 2800 mAh. The high capacity battery is essential as the battery is charged inside the headlamp, and therefore needs to be able to power the light for a long time before recharging is needed.

SLIDING HYPERFOCUS™

The sliding Hyperfocus™ optical system collects the LED radiance and distributes it with maximum efficiency from a perfect round floodlight beam to a highly intensive, long range spot beam. Just slide the head of the lamp for the correct light setting.

RED WARNING LIGHT

The red blinking warning light on the back of the battery pack will make you visible from behind. The light can be turned on and off.
